THE SQUAD GAMES

Five posts that test your ability to think, resolve, plan and acquire information.

Along the way you can gain or lose money – but don't worry, it's not real. We play with an imaginary currency: **FC (flex-coins)**.

100
FC

Starting credit for every team

POST 1
What is this? What is what?

POST 2
The art of engineering

POST 3
Knowledge is king

POST 4
Co-operation

POST 5
Tic Tac Run

POST 1

What is this? What is what?

- An item is hidden under a cover.
- Lift the cover for 15 seconds: the item can be touched, lifted and studied.
- Google and even AI are allowed – but **taking pictures is NOT**.
- After 15 seconds the cover goes back on.
- Buy another 15 seconds for **5 FC**, or a hint for **10 FC**.

HOW TO GAIN FC

Guess the item correctly: **+50 FC**

POST 2

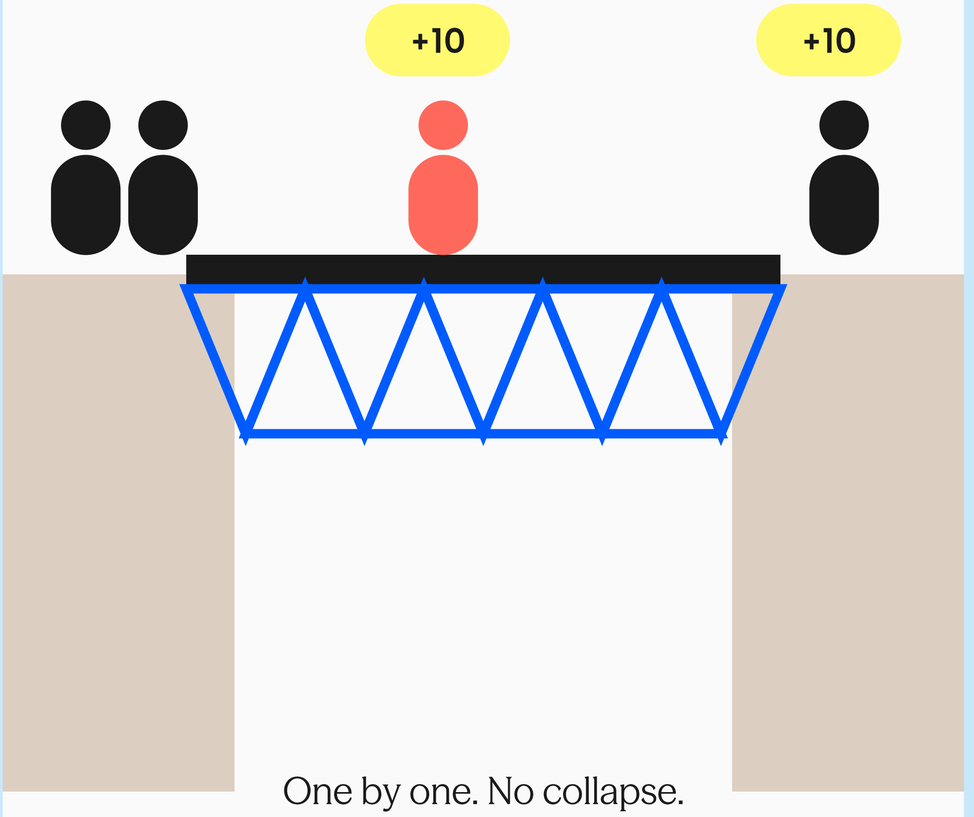

The art of engineering

- Build a bridge using only the provided set of materials.
- The bridge must carry the whole team across — one member at a time.
- Plan it, build it, trust it... then walk it!

HOW TO GAIN FC

Each member who crosses without the bridge collapsing: **+10 FC**

Whole team across = **+10 FC × team size**

POST 3

Knowledge is king

- A quiz with 6 tricky multiple-choice questions and 6 tricky riddles.
- Questions stay hidden until a team buys one. Once purchased — no way back.
- Right answer: you get **double** the price back.
- Wrong answer, or no answer before the end of the game: the money is gone. Want another chance? Buy the question again.
- No time limit — but **no Google and no AI**.

HOW TO GAIN FC

Questions are priced from **3 FC to 60 FC** according to difficulty. You may guess the rest. (pun intended)

POST 4

Co-operation

- Classic Engineering Alias: explain the word – without saying it.
- Teams compete against each other, and you choose which team to challenge.
- Each team gets a randomly selected set of 10 cards.

First to solve takes the FC

HOW TO GAIN FC

First team to solve a card: **+5 FC** for each solved card.

POST 5

Tic Tac Run

- Team vs team relay. A tic-tac-toe grid waits at the far end of the track – out of sight from the start.
- The first 3 runners each carry an O or an X and place it wherever they want.
- After that, the next runners may move the pieces already placed.
- Be strategic: complete your own row, or block the other team first?
- Nobody waits for turns – think too long and the other team catches up!

HOW TO GAIN FC

5 rounds. For each win, the winning team steals **10 FC** from the loser's pot.
